# the VA GOMER

There once was a gomer in Philly,  
Who thought health care was quite silly.  
He drank and he smoked  
And he nearly croaked  
A perfect patient for Woodland & University.

This same VA gomer developed COPD,  
And later converted his PPD.  
One day it grew cold  
And he got less bold  
And was admitted to 5 South on MCP.

The old chart was 10 inches thick,  
It was enough to make the intern sick.  
After 6 H & P's  
And blood cultures time three  
The old gomer really had had it.

A week later the SMA-6 was ready  
Which showed a blood sugar of 580  
He needed an IV  
Ad blood sugars q.i.d.  
And got stuck by the student, excessively.

The gomer received little attention,  
Other than use as a pin cushion.  
Although the nursing care  
Left his behind quite bare;  
He tolerated his hospitalization without question.

The old man did quite remarkably,  
And went on to a near full recovery.  
And the student of MCP  
Finally got his MD  
Knowing it was the gomer who had taught him, you see.

A black and white photograph of a residential street scene. In the foreground, a white bus is parked on the left, and a dark car is parked on the right. A street lamp stands on the right side. The background features several multi-story brick buildings with many windows, some of which are boarded up. Bare trees are visible in front of the buildings.

A black and white photograph of a Nikon microscope, showing the eyepiece, objective lenses, and the base. The microscope is positioned diagonally, with the eyepiece at the top right and the base at the bottom left. The objective lenses are visible in the center. The background is dark and out of focus.

## GROSS EXAM —

LOCATION OF SPECIMENS & DIRECTION  
OF "FLOW" — (WALK; DO NOT RUN) — TK

Good afternoon ladies and gentlemen, I would like to welcome you to this informal conference on adrenergics. Before we begin, I have several announcements to make and I hope you will bear with me while I make them.

First of all concerning the film series. Because of poor attendance at the optional film series, we have decided to make the optional films required and the required films optional. There will be a required film this afternoon. The film is clinically oriented and is titled "The effects of Ouabain on the denervated clam heart."

The last part of the Pharmacology Handbook is ready for distribution. People will be able to pick up the pages at two different times. Those in the alphabet from A-W can come from 11:40 to 11:45 A.M.. Those names from X-Z can pick up their pages from 2: to 5:00 P.M.. We arranged two times to avoid long waiting.

There will be a Pharmacology quiz next week. We hope everyone has received a secret number and that you will remember it. However, if you forget your number, there will be a list of names and numbers outside this Pharmacology office before this quiz.

A question was raised about the format of our quizzes and whether we are using the same questions as last year. We are using the same questions, but the answers have been changed.

Thank you

Pathology taught us the vocabulary,

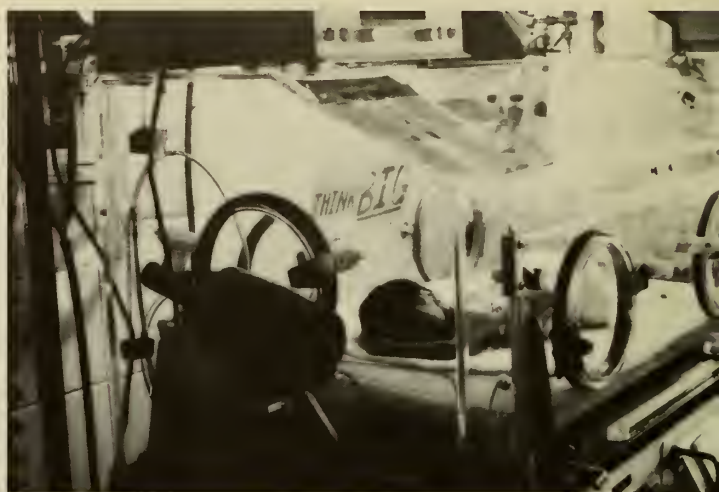

Micro taught us the difference between pink and blue,

Pharm taught us a vocabulary we had to relearn,

And ICLM taught us how to diagnose the diseases we convinced ourselves we had.

# Crossing The Rubicon, Junior

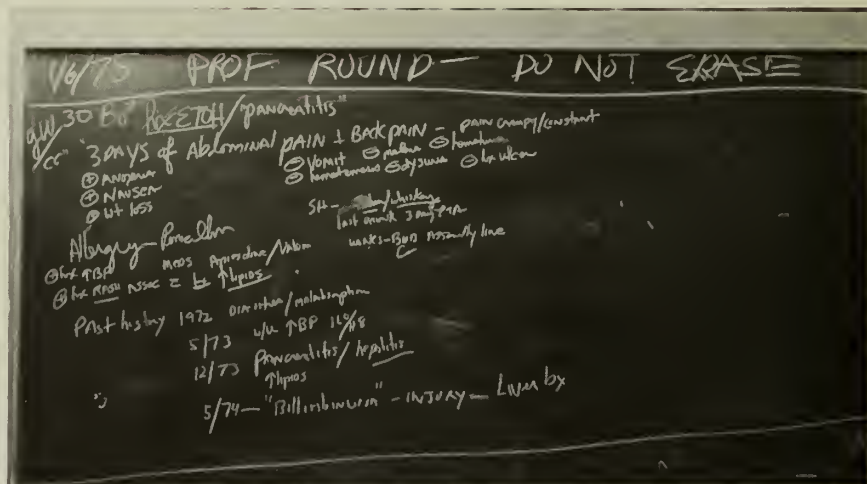

On Medicine we learned

# Putting It All Together, Senior

# heath of aimonides

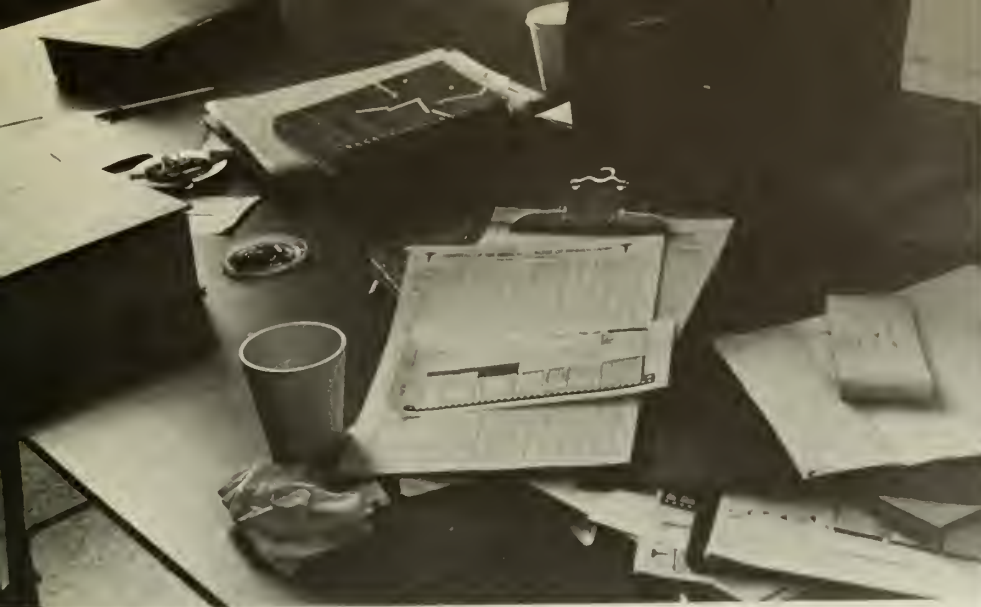

thy eternal providence has appointed me to  
watch over the life and health of thy  
creatures

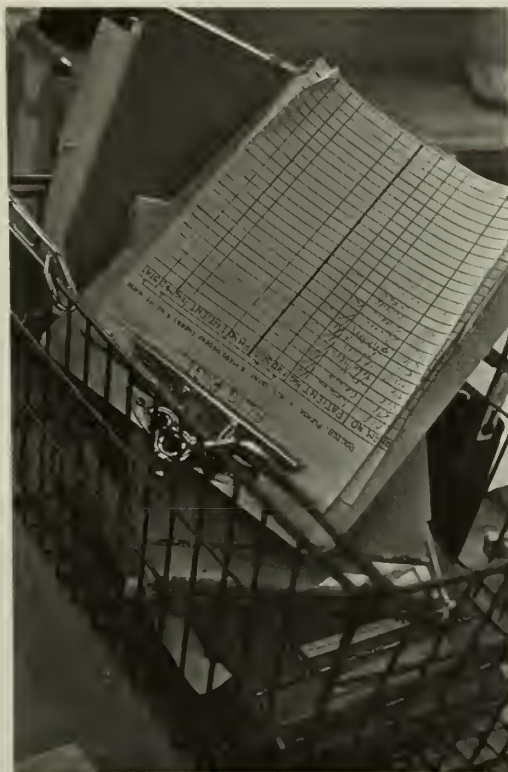

may the love for my art  
actuate me at all times; may neither avarice nor  
miserliness, nor thirst for glory, or for a great  
reputation engage my mind; for the enemies of truth  
and philanthropy could easily deceive me and make  
me forgetful of my lofty aim of doing good to thy  
children. may I never see in the patient anything  
but a fellow creature in pain

grant me  
strength, time and opportunity always to correct  
what I have acquired, always to extend its domain  
for knowledge is immense and the spirit of man  
can extend infinitely to enrich itself daily with new  
requirements. today he can discover his errors  
of yesterday and tomorrow he may obtain a new  
light on what he thinks himself sure of today

God, thou hast appointed me to watch  
over the life and death of thy creatures; here am  
ready for my vocation, and now turn unto my calling

## And Then Internship . . .

Looking out the window as the  
seasons change  
Our youth seem to fly away.  
We study learn but, the memories  
fade  
And the fear remains that what  
We forget may someday save.

# THE CLASS OF 1976

As a sophisticated second grader I staunchly told my physician father, "No way!" I couldn't stand germs, dirt, or the sight of blood.

In high school, I reconsidered.

This is me in college before those thick medical textbooks wore out my eyes and drained the color from my hair.

The man who follows the crowd, will usually get no further than the crowd. The man who walks alone is more likely to find himself in places no one has ever been before.

Creativity in living is not without its attendant difficulties, for peculiarity breeds contempt, and the unfortunate thing about being ahead of your time is that when people finally realize that you're right, they'll say it was obvious all along.

You have two choices in life; you can dissolve into the mainstream, or you can be distinct. To be distinct you must be different. To be different you must strive to be what no one else but you can be . . .

Durante tutto il viaggio la nostalgia non si è separata da me  
non dico che fosse come la mia ombra  
mi stava accanto anche nel buio  
non dico che fosse come le mie mani e i miei piedi  
quando si dorme si perdono le mani e i piedi  
e io non perdevo la nostalgia nemmeno durante il sonno

durante tutto il viaggio la nostalgia non si è separata da me  
non dico che fosse fame o sete o desiderio  
del fresco nell'afa o del caldo nel gelo  
era qualcosa che non può giungere a sazietà  
non era gioia o tristezza non era legata  
alle città alle nuvole alle canzoni ai ricordi  
era in me e fuori di me

durante tutto il viaggio la nostalgia non si è separata da me  
e del viaggio nulla mi resta se non quella nostalgia.

In going where you have to go, and doing what you have to do, and seeing what you have to see, you dull and blunt the instrument you write with. But I would rather have it bent and dull and know I had to put it on the grindstone again and hammer it into shape and put a whetstone to it, and know that I had something to write about, than to have it bright and shining and nothing to say, or smooth and well-oiled in the closet, but unused.

Now it is necessary to get to the grindstone again. I would like to live long enough to write three more novels and twenty-five more stories. I know some pretty good ones.

Dr. Alichanian.

Sanan L. Atamian, M.D.

The dream began: be a doctor. A fulfilling dream, one which reaches far back in my family's history. My great grandmother was a doctor, and her aunt, Ann Preston, was one of America's earliest woman physicians.

So I got on the yellow brick road, and with good luck, hard work, and encouragement from everyone I knew, I came to medical school.

I've found these years as satisfying as I had hoped they would be, demanding and trying in unanticipated ways, resulting in much personal growth, for which I am grateful.

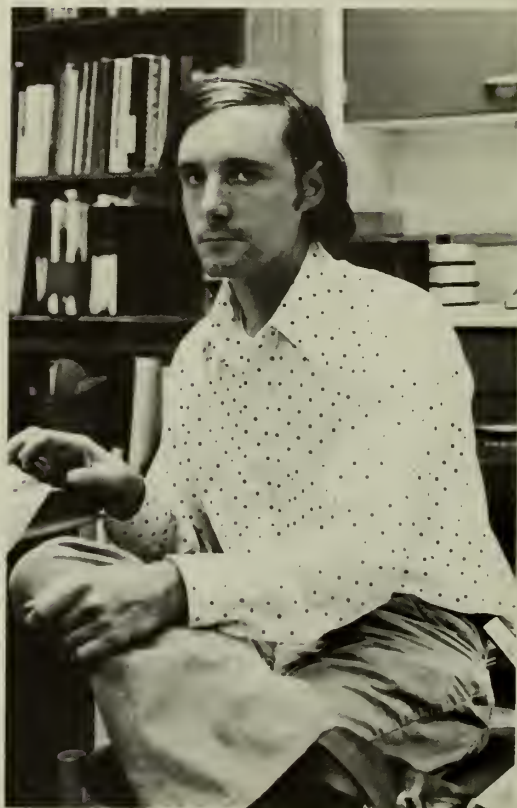

My dreams and hopes continue undaunted. I hope to have a practice in the country one day, but most important is the inner peace, happiness, and satisfaction of a full and well-lived life, of sharing, loving, giving and receiving in turn.

regulated."

"Which one for tonight?"

21,938 hours, this, and 10¢ won't get you a cup of coffee.

"What do you mean? It's 9 p.m. and Contino's sleeping?"

The morning after the night before.

Escape to the real world.

"Thank god, they added Peanuts to the NEJM."

# THE 1976 IATRIAN

**Presents for Outstanding**

**Contribution to Our**

**MCP Experience**

**THE GOLDEN**

**FOLEY AWARD**

To: Pediatrics, for providing more quizzes than patients.

To: The nurses of the V.A., for cultivating decubiti to a record crop.

To: Julian Katz, who said "It may be shit to you, but it's bread and butter on my table."

To: Linton's cafeteria, if their food doesn't induce indigestion, their choice of wallpaper will.

To: Dr. Kirshbaum, for getting under our skin, and a rash of other complaints.

To: The Marriott Inn, for devising the giant Idaho baked potato, without which there would have been no 100 day dinner.

To: Harrison, for providing the teaching on the junior medicine rotation.

To: Dr. Chesnick, for his verbose esoteric pathologic correlations of common radiologic entities.

To: Dr. Urrichio, for his uncanny ability to consistently avoid rounding with us.

To: Dr. Jacobi for not teaching us anything worth all that testing.

To: Steve Baskin, for stopping overcrowding in the classroom by his stimulating lectures.

To: The National Boards, it tested our stamina, if nothing else.

To: MCP in general, no matter what happens, it's never good enough or on time.
